What is a DPIA?
- A process which helps you to identify, assess & minimise privacy risks
- A key tool to demonstrate your compliance & accountability under GDPR

When does the ICO say to carry out a DPIA?
- Identify the need for a DPIA
- Describe the processing of personal data
- Consider if consulting with the ICO is appropriate
- Assess the necessity and proportionality of processing
- Identify and assess any privacy risks
- Identify appropriate measures to mitigate these risks
- Sign-off DPIA and record the outcomes
- Integrate the outcomes into a plan and keep it under review
